

Automated School IT Helpdesk Ticket Classification in ServiceNow

PHASE 6: PROJECT TESTING PHASE

Comprehensive verification ensures that database constraints, automated classification rules, reference lookups, and outbound email notifications function accurately.

- **Validation Criteria:** Quality assurance testing verifies that mandatory fields are enforced upon submission, auto-numbers generate sequentially without duplicates, reference fields resolve accurately to the sys_user and sys_user_group tables, and access controls restrict unauthorized record modifications.

Test Execution: End-to-end test scenarios confirm live workflow accuracy across both the live instance execution and reference specification scenarios:

- **Test Case 1 (Network / Wi-Fi Issue):** Submitting ticket INC0001003 for caller Abel Tuter ('Network not working in library') and ticket INC0001004 for caller Abraham Lincoln ('Network issue') [Reference Spec: INC00511 for Alfonso Griglen] evaluates the If branch to True and automatically populates Category = Network and Subcategory = Wi-Fi.
- **Test Case 2 (Hardware / Projector Issue):** Submitting a hardware ticket with the short description 'Projector not turning on' [Reference Spec: INC00512 for caller Sam Sorokin] evaluates the second branch to True and automatically populates Category = Hardware and Subcategory = Projector.
- **Email Confirmation:** Outbound email generation and delivery status are verified under System Logs -> Emails (confirming send-ready SMTP delivery to abraham.lincoln@example.com with subject 'Your Request for the issue has been submitted' and body 'Ticket confirmation message').

Quality Assurance Test Execution Matrix

Test ID	Test Scenario & Record	Input Values Provided	Expected System Output	Status
TC-01	Auto-Number & Reference Check (INC0001003)	Caller: Abel Tuter SD: 'Network not working in library'	Unique INC number generated; sys_user reference resolved accurately.	PASS
TC-02	Flow Designer Auto-Classification (INC0001004)	Caller: Abraham Lincoln SD: 'Network issue' Category: [Empty]	Branch 1 evaluates True; updates Category = Network, Subcategory = Wi-Fi.	PASS
TC-03	Hardware Keyword Classification (INC00512 Spec)	Caller: Sam Sorokin SD: 'Projector not turning on'	Branch 2 evaluates True; updates Category = Hardware, Subcategory = Projector.	PASS
TC-04	Outbound Caller Email Verification	Target: INC0001004 Recipient: abraham.lincoln@example.com	Email logged in System Logs -> Emails; Preview shows 'Ticket confirmation message'.	PASS
