

Automated School IT Helpdesk Ticket Classification in ServiceNow

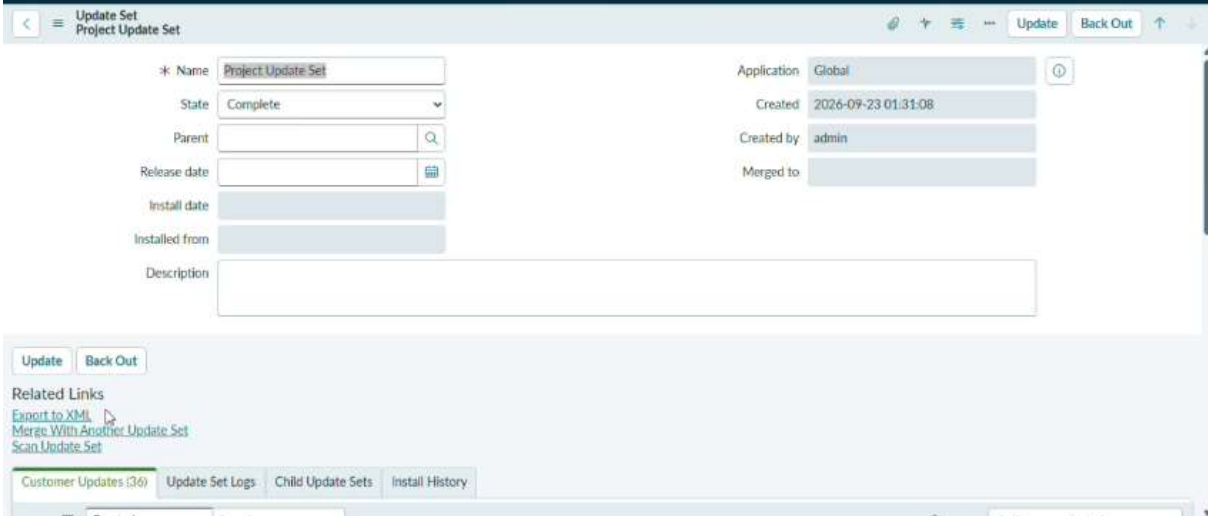

PHASE 8: PROJECT DEMONSTRATION PHASE

The final phase packages the completed solution for portable deployment and demonstrates live system capabilities from ticket creation to caller notification.

- **Release Packaging:** The Project Update Set state is updated from In progress to Complete, saved, and exported via the Export to XML related link (producing sys_remote_update_set_5833be8b83234610b5bfcf5dfeeaad3d.xml in the live instance / sys_remote_update_set_a7b40de6fc590ceaad36c.xml in the reference baseline) for seamless distribution and GitHub submission.
- **Live Walkthrough:** The live demonstration highlights dependent dropdown filtering on the Incident WorkFlow form, submits a new ticket containing only the Caller and Short Description, runs and verifies automatic Category and Subcategory classification, and previews the outbound confirmation email in System Logs.

Activity 8.1: Completing the Local Update Set & Exporting to XML

1. Navigate to All -> System Update Sets -> Local Update Sets and open Project Update Set.
2. Change State from In progress to Complete and click Save.
3. Under Related Links, click Export to XML to download sys_remote_update_set_5833be8b83234610b5bfcf5dfeeaad3d.xml (36 Customer Updates captured).

The screenshot displays the 'Project Update Set' form in ServiceNow. The 'Name' field is 'Project Update Set', 'State' is 'Complete', and 'Application' is 'Global'. The 'Created' timestamp is '2026-09-23 01:31:08' and 'Created by' is 'admin'. The 'Export to XML' link under 'Related Links' is highlighted with a mouse cursor. The bottom navigation bar shows 'Customer Updates (36)', 'Update Set Logs', 'Child Update Sets', and 'Install History'.

Marking 'Project Update Set' State as 'Complete' and Selecting 'Export to XML' (36 Customer Updates)
